

# CoinCollect

Litepaper

You can find us on [coincollect.cc](https://coincollect.cc)

## Our mission

Our mission is to get everyone on board with crypto. We will make cryptocurrency easy to buy, trade and manage for the average user. CoinCollect permits anyone to secure their position in crypto and maintain full control over their coins. No more risking your funds with third parties.

## Mobile application

**ONE PLATFORM** - To buy, manage and exchange your coins & tokens. We integrate the best fiat gateways to make sure you can buy crypto with dollars or euros using the CoinCollect application. Cutting edge decentralized technology is used to ensure that you can easily exchange and securely store your coins for a seamless experience.

**YOUR KEYS, YOUR COINS** - in CoinCollect we use advanced decentralized exchange technology allowing us to make sure you own your keys at all times. This means you are in control.

Eliminating the problems you had with the first generation (1.0) exchanges and their vulnerabilities.

**SMOOTH EXPERIENCE** - CoinCollect is the smoothest experience there is in a blockchain application. Every screen navigates intuitively. Everything is clear as daylight.

No more frustrating moments in which you want to just smash your device against a wall.

## The team and the project

We are a decentralised team with a shared vision. In our vision, the software is decentralised, secure, free, open and respecting privacy.

CoinCollect is a project. It does not have shares and can never sell out to the big boys. Instead, all benefits are distributed among coin holders and to the ones who donated time or money. All gains flow back to the CoinCollect community.

## Why people use our solution

The CoinCollect mobile application is a window into the world of blockchains. No user account is needed, all coins are stored on the blockchain!

We bring peer-to-peer swaps in an easy way, you can exchange one coin for another without ever losing ownership over your coins. Without the hassle of accounts or KYC. These are important features for freedom and privacy!

Of course, when converting to or from fiat money (Dollar/Euro) KYC/AML is applied via third parties.

## Commercial model

- 1 A margin of at least 3% on each transaction is charged using special Liquidity Provider nodes
- 2 Users are estimated to swap on average €50 a week using our application

## Organization & reward structure

## Projections based on 100.000 CC

### Projections

These projections are based on **one application** only using the CoinCollect reward system. It is also only based on the in-app trade margins.

Fiat gateways, BarterDEX fees and other reward generating opportunities are not included.

Time	Users	Monthly trades	Margin	Monthly margin on total trades	Monthly rewards per 100K CC	Accumulated paid rewards per 100K CC
2019-01	200	€200	3%	€1.200	€0,60	€0,60
2019-02	524	€200	3%	€3.144	€1,57	€2,17
2019-03	1.247	€200	3%	€7.483	€3,74	€5,91
2019-04	1.721	€200	3%	€10.326	€5,16	€11
2019-05	2.375	€200	3%	€14.250	€7,13	€18
2019-06	3.278	€200	3%	€19.655	€9,83	€28
2019-07	4.523	€200	3%	€27.138	€14	€41
2019-08	6.242	€200	3%	€37.450	€19	€60
2019-09	8.614	€200	3%	€51.681	€26	€86
2019-10	11.887	€200	3%	€71.320	€36	€122
2019-11	16.404	€200	3%	€98.422	€49	€171
2019-12	22.637	€200	3%	€135.822	€68	€238
<b>Year 1</b>	<b>31.239</b>	<b>€200</b>	<b>3%</b>	<b>€187.435</b>	<b>€94</b>	<b>€333</b>
<b>Year 2</b>	<b>311.370</b>	<b>€200</b>	<b>3%</b>	<b>€1.868.223</b>	<b>€934</b>	<b>€5.594</b>
<b>Year 3</b>	<b>2.269.141</b>	<b>€200</b>	<b>3%</b>	<b>€13.614.845</b>	<b>€6.807</b>	<b>€44.096</b>

User numbers based on 38% retention rate. Network effect: every user adds / inspires 2 friends, after 3 months this will decrease to 1 (200%), after 1 year to 1.8 friends (180%).

### Coin distribution

Opposed to many ICO's and startups a large portion of the coins is dedicated to the team.

This is the result of CoinCollect being a decentralized team rather than an organization. As in a normal company 70% of the revenue goes to the organization itself. In this setup 100% flows directly to the rewards.

The team takes care of the operation and development and has to take care of these investments out of pocket. The team is able to do so, as their stake generates enough rewards.

Total for investments **40.000.000 CC**

Already sold: **11.738.333 CC**

Available for this token sale round\*:

Amount	Price	Period
<b>10.000.000 CC</b>	<b>0.04 EUR</b>	<b>15 DEC - 15 JAN</b>

Further token sale rounds will be announced in the future.

\* U.S. residents can only participate in the token sale by investing a minimum of 100.000 USD for a discounted price as an accredited investor. Please contact us directly.

For investments of a minimum of 100.000 EUR contact us directly for a discounted price.

# Coin model

Next to the mobile application there is a CoinCollect blockchain. This is an independent blockchain made using Komodo Platform technology secured with Komodo's & Bitcoin's hashrate using Komodo's Delayed Proof of Work consensus mechanism.

It will feature the CC coin and crypto conditions a novel form of advanced smart contract functionality. CoinCollect chain will collect all rewards and redistribute these proportionally to all coin holders.

For using the CoinCollect mobile application there is no need to use the CC coin. However, we will encourage users to hold our coin by rewarding them with CC coins for performing certain tasks, a loyalty program & frequent trading. Furthermore the CC coin is the perfect coin to hold in your portfolio as it redistributes interesting rewards to its holders.

Over time we will advance tokenomics to boost network effects. We will reward the first 1000 users with CC coins via Airdrop and set up a referral program to allow users to earn extra CC coins for inviting friends.

## Coin specifications

Name	<b>CoinCollect</b>
Ticker symbol	<b>CC</b>
Total supply	<b>200.000.000</b>
Initial supply	<b>200.000.000</b>
Decimals	<b>8</b>
Type	<b>Komodo Independent Blockchain</b>

## Advisors & investors

S U P E R N E T

### SuperNET

SuperNET is a collaborative community of participating cryptocurrency coins and their development teams, alongside innovative coders, networking experts, social media and commercial development specialists and third party service providers, seeking to create a united platform of technologies focusing on the establishment.

SuperNET is invested in projects like Komodo, Bitcoin, IOTA, Syscoin & Stratis for a total of ~ 60M USD

### DEVSEC

We are happy to have DEVSEC as an advisor. With DEVSEC we have access to a decentralised team of engineers, developers and security experts including JL777 (tech lead Komodo) & CA333 (security lead Komodo).

DEVSEC is the ultimate partner to perform secure code reviews, exploitation and pen testing, avoiding exploits and more.
